

第二步，按下电脑键盘F12或F12+Fn，此时右边出现来了工具栏，点击工具栏左上角的手机切换按钮，刷新页面就可以模拟手机访问了

当然你还可以选择浏览器内置的手机类型来查看不同屏幕效果。

## 【wins重装2019】重装系统步骤（2019-03-06）

重装系统步骤

把文件下载直接放到盘内，不设置文件夹

文件有

- 1: USDONEKEY\_v9—键还原精灵
- 2: win7-64-pure-8.04.GHO （系统文件）-映像文件

打开USDONEKEY\_v9—键还原精灵

点击一键备份，电脑会自动重启进入备份，静静等待进度条走完，电脑会重启。（注：系统备份的时候千万不要断电、鼠标停止或者关机，要不系统会崩溃）这时你的工作就算OK了  
如果电脑在使用中出现问题，你首先把桌面重要文件（比如照片、视频文件或者文档类）复制到你电脑的其他盘符，以免还原系统后丢失删除。点击USDOneKey\_v9.exe软件的一键还原恢复系统，不必再次做系统了。

点击这里-设置--

选择-还原分区(R)-C盘-点击确定-开始还原c盘系统

最后就好了，安装软件

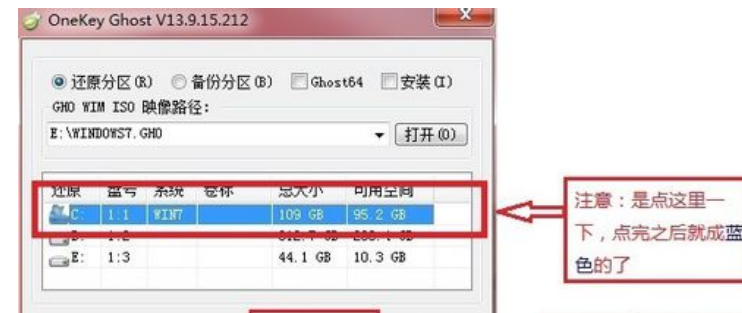

接下来，在Onekey ghost选择还原分区，在GHO WIM ISO映像路

径中选择刚才下载的Win7系统镜像Windows7.GHO，见下图

在下方选择还原到C盘（注意：是点击下面的C盘一下，点击之后会变成蓝色的），如下图

然后点击确定

The screenshot shows the Symantec Ghost 11.0.2 interface. At the top, a copyright notice reads: "Symantec Ghost 11.0.2 Copyright (C) 1998-2007 Symantec Corporation. All rights reserved." Below this is a "Progress Indicator" section with a horizontal progress bar. The bar is divided into five segments, with the first segment filled in blue. Below the bar, the progress is labeled as 0%, 25%, 50%, 75%, and 100%. To the right of the progress bar is a small, stylized drawing of a ghost. Below the progress bar is a "Statistics" section with a blue background. It contains a table with the following data:

Statistics	
Percent complete	40
Speed (MB/min)	253
MB copied	385
MB remaining	573
Time elapsed	1:01
Time remaining	2:15

Below the statistics is a "Details" section with a white background. It contains a table with the following data:

Details	
Connection type	Local
Source Partition	Type? [NTFS], 10236 MB, 2184 MB used, MIN_C from Local file D:\~\1\C_PAN.GHO, 20480 MB
Target Partition	Type? [NTFS], 10236 MB from Local drive [I:], 20480 MB
Current file	2302 ump.dll

At the bottom of the interface is the Symantec logo, which consists of a stylized 'S' inside a circle, followed by the word "symantec." in lowercase. To the right of the Symantec logo is the Baidu logo, which consists of the word "Baidu" in a stylized font, followed by the Chinese characters "经验" (Experience) and the URL "jingyan.baidu.com".

然后重装系统Win7就完成啦，接下来就会进入Windows系统，系统

会自动进行安装，同样什么都不需要做，等待进入桌面后，重装系统完

 $\frac{1}{10}$ 

THE UNIVERSITY OF CHICAGO

如果是老的电脑的诒别的方法都没用  
个人认为应该是跟电脑的位数有关系  
为什么不重要了 重要的是安装真个就能缩略图了

下载软件地址: <https://www.iplaysoft.com/media-preview.html>

结论: 真的可用!
